SAVING PET DOGS AND CATS FROM VIVISECTION IN CANADA

Imagine a door or gate has accidentally been left open and your beloved dog or cat wanders out and becomes lost. Accidents like this do happen, you search frantically scouring the neighbourhood putting up lost pet posters in your community visiting the local animal shelters, but never finding your beloved pet.

This very short story happens to be true, it happened to Laurie Bishop and her 13 year old Golden Retriever named Royal. Royal one day wandered off their property; a neighbour found

him but didn't know where he lived so she called the local animal control officer. Laurie began her frantic search unable to find Royal she called the local pound, but the pound keeper wouldn't tell her what had happened to Royal, so she contacted the people at the Animal Alliance. They found out that shortly after Royal had arrived at the pound he was illegally sold to the University of Guelph for research, but as he was too old to be used for research he was killed. Laurie is devastated and heartbroken.

It appears that the majority of dogs and cats used in Canada's research laboratories were pets!

The Animals for Research Act mandates that dogs and cats unclaimed after the legislated holding period must be sold to the research facilities when requested. The legislation stipulates that researchers can buy a cat from an animal pound or shelter for \$2 (£1.50) and a dog for \$6 (£4.50).

The campaign led by the dynamic Animal Alliance of Canada to outlaw this immoral practice is gathering speed. The Green Party supports the ban and intense pressure is being put on the Canadian Government to stop the use of pet dogs and cats in research laboratories. Graphic pictures of animal experiments taken undercover by the IAAPEA's Brian Gunn have been used on Canadian television in an advertising campaign.

We intend to fight until research on our pets has ended for good. Pet dogs and cats need to be in our homes and not imprisoned in laboratory cages in vivisection laboratories.

DOGS AND CATS IN VIETNAM SAVED FROM THE COOKING POT

The International Association Against Painful Experiments on Animals has saved many dogs and cats in Asia from the cooking pot. We are pleased to report that after prolonged pressure from the IAAPEA and other animal groups, officials in Vietnam's capital Hanoi are urging residents to stop eating dog and cat meat. The Hanoi Peoples Committee said this practice could tarnish the city's image as a civilized and modern capital. It highlights the fact that many of the animals were cruelly killed.

There are currently around 1,000 restaurants and markets that sell dog and cat meat or "Little Tiger" as cat meat is sometimes known as on the menus!

MOST AMERICANS NOW OPPOSE ANIMAL EXPERIMENTATION

A new PEW survey reveals that the majority of American's - 52% in fact oppose the use of animals in scientific research. This number is up from 43% who held that belief in 2009.

These findings are consistent with overall trends recruited in recent Gallup Polls which have shown decreasing levels of support for medical testing on animals since Gallup began Polling on the issue in 2001.

ALTERNATIVES – MAJOR BREAKTHROUGH IN TOXICITY TESTING

Advanced algorithms working from large chemical databases can predict new chemical toxicity better than standard animal tests – suggests a study led by scientists at the John Hopkins Bloomberg School of Public Health.

These results are a real eye-opener, they suggest that we can replace many animal tests with computer-based prediction and get more reliable results, states the principal investigator Thomas Hartung MD PHD, the Doerenkamp Zbinden Chair and Professor of Environmental Health and Engineering at the Bloomberg School.

Picture Brian Gunn / IAAPEA ©

THOUSANDS MORE EXPERIMENTS PERFORMED ON HORSES IN THE UK

Researchers carried out 3,789,373 experiments on animals in Britain during 2017 according to Government statistics. The numbers have risen by about 5% since 1987.

Horses were involved in 10,600 experiments in 2017 an increase of 18% from the previous year.

HOW YOU CAN **HELP** THE ANIMALS

Remembering animals in your Will is one of the most powerful gifts a person can make to stop animals being tortured in vivisection laboratories.

Many of our supporters are surprised when they learn that gifts in Wills now provide the International Association Against Painful Experiments on Animals with over half of the funds needed to save dogs, cats, monkeys, rabbits, horses and other animals from torture in the world's vivisection laboratories.

Even if you think you don't have much to leave, you would be surprised how a small amount can save many defenceless animals in research laboratories from cruelty and abuse,

A gift in a Will is the lifeblood for the International Association Against Painful Experiments on Animals, funding our ground-breaking undercover work and our pioneering worldwide campaigns against painful experiments on animals.

Please leave behind a better world for the animals with a gift in your will to the International Association Against Painful Experiments on Animals.

Your legacy can make us unstoppable in our fight to end vivisection – for good.

Without your help the voiceless animals imprisoned in laboratories have no hope!

GLOBAL MEDIA AND WORLDWIDE ANIMAL SOCIETIES USING IAAPEA UNDERCOVER PHOTOS

Researchers do not want the general public to know what really happens behind the closed doors of their animal research laboratories, they have too much to hide!

A picture paints a story and can evoke strong emotions of anger and sadness which is a powerful way to encourage people to act.

The International Association Against Painful Experiments on Animals has an extensive International photo library which holds the world's largest collection of animal experiment pictures and has become a leading source for high quality animal testing images for the global media and animal society's worldwide.

To publicise our iconic undercover images of animal experiments the IAAPEA have recently launched 5CD discs containing over 300 high resolution images of laboratory cruelty, taken undercover by Brian Gunn. There are thought provoking pictures of birds – cats – cows – dogs – guinea pigs – hamsters – mice – monkeys – rabbits – rats and sheep along with the laboratory equipment, they all have high resolution images.

The world's two largest animal societies PETA and The Humane Society International have used our images in their campaigns. The Humane Society International have over 12 million supporters

Picture Brian Gunn / IAAPEA ©

globally and offices all over the world, they asked the IAAPEA to sign an international photographic agreement with them. As a result of this legal agreement millions more people all over the world will now be viewing our powerful animal experimental images.

Below is a small selection of thank you letters from animal societies worldwide, these organisations have recently received our free DVD box containing the 5 discs with over 300 pictures of animal experiments and testing.

Hi Brian

I hope that you are well – 2 things – we posted the video we made with your photos on June 13th and The Humane Society International has also been using the video.

We're still moving ahead with more work – and GUESS WHAT – when we re-inserted the disk of photos of animals in cosmetic testing – it snapped! We're devastated and I'm hoping that there's a way that you can share them with us again?

LUSH COSMETICS (CANADA)

Dear Brian

The collection of pics. you sent to us has been passed to me. Please could you forward a number or call me, many thanks.

THE TIMES NEWSPAPER (UK)

Dear Brian Gunn

I received the DVD's with pictures. I would like to thank you for the photos.

STICHTING ANIMAL RIGHTS (THE NETHERLANDS)

Dear Brian

Thank you immeasurably for the undercover DVD's. It is a great exposure work that is a great asset in the sensitization of the suffering of animals used in the lab environment. Thank you so much for your courage and bravery. I believe some animals will breathe easier because of this work.

AFRICA NETWORK FOR ANIMAL WELFARE (KENYA)

Dear Brian

We do not know how to thank you for giving us your precious undercover photos that you have taken risking your life.

From your letter we feel your strong passion to save laboratory animals. We will make better use of your photos for our activities.

Thank you again for your kindness.

Best wishes

JAVA - JAPAN ANTI-VIVISECTION ASSOCIATION

Dear Brian

I wanted to thank you sincerely, not just for sending the photos to us to use, but also for your courage in undertaking the task of getting these images. It must have been very traumatic getting into these places and of course bearing witness to such suffering.

With my gratitude and kindest regards

HUMANE RESEARCH AUSTRALIA

Dear Mister Gunn

We have received your sending including the CD ROMS of your photos taken in labs and we thank you very much for them.

We are very grateful to you for your confidence in our work and we can assure you that we shall make good use of them.

Faithfully yours so many thanks.

ONE VOICE (FRANCE)

Dear Brian

 We have received your undercover photos of animal testing. Thank you very much for taking the time to send them to us and giving us the permission to use them.

Kind regards

**ANIMAL POLITICS FOUNDATION/
PARTY FOR THE ANIMALS (THE
NETHERLANDS)**

Dear Mr Gunn

 You can rest assured that these images will be used by us to continue to turn public opinion in our favour, and the sacrifice you've made on behalf of animals won't go to waste.

**NATIONAL ANTI-VIVISECTION
SOCIETY (AMERICA)**

Dear Mr Gunn

 Thank you very much for sending the CD's with pictures. Thank you also for letting us use them. When we do we will of course mention the source.

Best wishes

**GAIA – VOICE OF THE VOICELESS
(BELGIUM)**

Dear Brian

 Thank you for sending us your discs of animal experimentation photos, I appreciate the effort you have undertaken to obtain these photos.

IFAW (UK)

Hello Brian

 Thank you for the present you have sent.

We would like to use the photos indeed!

Thank you very much for your great work.

**PEOPLE FOR ANIMAL RIGHTS
(GERMANY)**

Warm thanks, Brian

 We will be in touch.
**QUAKER CONCERN FOR
ANIMALS (UK)**

Dear Brian

 Thank you too much for your CD with photos of animal experiments. We will definitely use them in our information campaign.

**CENTER FOR THE ETHICAL
ATTITUDE TOWARDS NATURE
(BELARUS)**

Dearest Brian

 Well.....thank you!! We really appreciate your kind gesture.

As you surely know we are deeply committed to the fight against animal testing and we will strive to make the best possible use of the photographs you provided us with. Once again Brian, thank you so much.

**INTERNATIONAL ORGANISATION
FOR ANIMAL PROTECTION (ITALY)**

Dear Mister Gunn

 We thank you very much for sending us the pictures and for the engagement for animals and the courage you had to do them.

Best regards

**LIGUE SUISSE CONTRE LA
VIVISECTION (SWITZERLAND)**

Hi Brian

 I am writing to respectfully request permission to use your photographs in a power point presentation to an animal issues thematic cluster (AITC) of United Nations delegates, who are meeting in July.

**THINKING ANIMALS UNITED
(AMERICA)**

Greetings Brian

 We got your amazing package of CD's with photos from various animal experiments. Thank you!! We will certainly publish them.

**ISRAELI SOCIETY FOR THE
ABOLITION OF VIVISECTION
(ISRAEL)**

Dear Brian

 I write to acknowledge safe receipt of the 5 free CD ROMS containing undercover animal images which I note you are happy for our organisation to use free of charge.

With all good wishes and thank you for putting yourself under such horrific circumstances to help bring about awareness of the cruelty that goes on behind closed doors.

ANIMALS VOICE (UK)

Hi Brian

 Thank you for the CD ROMS with pictures we received in the mail today and the work you've done. It's always helpful to have a lot of pictures and material to use and choose from. Keep up the good work.

NOAH ANIMAL RIGHTS (NORWAY)

Hello Brian,

 Thank you very much for sending us your photographs on disk: it's very good of you. They provide a shocking and eloquent account of animal research as it really is away from the journals and PR and they've been very helpful indeed to the VERO blog.

With thanks again and best wishes,

**VOICE FOR ETHICAL RESEARCH-
OXFORD UNIVERSITY GROUP (UK)**

Dear Brian

 Thank you so much for the CD's of undercover pictures of animal experiments. I just wanted to let you know that we are using several pictures in a TV ad about our campaign; No Pets in Research.

We are so grateful for the work you do and for making the pictures available. Such pictures are very hard to come by.

ANIMAL ALLIANCE OF CANADA

Hi Brian

 Attached is our photo licensing agreement. Could you sign this when you have a chance and send it back to me? Let me know if you have any questions or concerns.

Thanks so much Brian!

**HUMANE SOCIETY (AMERICA)
HUMANE SOCIETY INTERNATIONAL**

CAMPAIGNING IN AFRICA

The International Association Against Painful Experiments on Animals have been working closely with the African Network for Animal Welfare for many years.

Great progress has been made with new animal welfare legislation and the establishment of animal welfare clubs in schools.

Between the 3rd – 5th September 2018 the IAAPEA helped sponsor the African Animal Welfare Conference at the United Nations complex in Nairobi, Kenya. This conference was organised by the African Network for Animal Welfare and it was co-hosted by the United Nations Environment and the Government of Kenya.

The focus of the conference was People, Animals and the Planet; One Health, One Welfare. Over 300 delegates from 23 nations attended this very successful event.

COSMETIC TESTING IN EASTERN EUROPE

Over 40 countries have now made it illegal to test cosmetics on animals, but to enact new legislation to ban cosmetic testing on animals in Eastern Europe is proving a lot more difficult.

The International Association Against Painful Experiments on Animals is campaigning throughout Eastern Europe to outlaw cosmetic testing on animals.

Our Association has also launched a new project with our member society in Belarus the (Centre for the Ethical Attitude Towards Nature) to help sponsor an information campaign in Belarus to highlight the cruel practice of testing cosmetics on animals and to campaign for new legislation in the Belarus Parliament.

IAAPEA ACTION

Torture knows **NO** frontiers

- During the next 12 months over **150 million** innocent, defenceless animals will be abused in animal research laboratories.
- The IAAPEA is the only anti-vivisection organization which has Consultative Status with the United Nations.
- The International Association Against Painful Experiments on Animals is the only International Organization campaigning globally SOLELY for laboratory animals.
- Founded in 1969, the IAAPEA established World Day for Laboratory Animals. Introduced in 1979, World Day for Laboratory Animals is now a focal point for Actions Worldwide.
- The IAAPEA fund humane medical research without cruel animal experiments into cancer, heart disease, diabetes and other illnesses.
- The IAAPEA organises and finances groundbreaking undercover work to obtain vital photographic evidence of the cruelty involved in animal experimentation.
- Newspapers, magazines, politicians, animal organisations and TV stations all over the world are using our unique animal testing pictures — which the public were not meant to see.
- The IAAPEA initiated and fostered opposition to animal testing in countries where previously there was little or no activity on behalf of laboratory animals.
- The IAAPEA are not campaigning for larger laboratory cages, but empty cages.
- Please remember the imprisoned laboratory animals in your will and leave behind a better world for the animals.

Scientific Director:

Dr Robert Sharpe (UK)

Who cares about...

Dogs in Russian laboratories?

Monkeys in Chinese laboratories?

Cats in Japanese laboratories?

WE DO!

The International Association Against Painful Experiments on Animals desperately needs your help to stop dogs, cats, monkeys, rabbits, horses and other animals from being blinded, suffocated, drowned, poisoned, starved to death, burnt, mutilated in barbaric surgery or subjected to chemical and biological weapons and abused in laboratory hellholes worldwide.

9 out of 10 animal experiments are performed without anaesthetics!

Your legacy will make a real and lasting difference by helping us to end this barbaric cruelty and torture on animals in vivisection laboratories worldwide.

It is of the utmost importance that those intending to benefit the Association should state in their Will the Association's full name and address. Failure to use the correct title may lead to costly litigation and the loss of the whole or part of the legacy.

We earnestly ask all testators to use the following form of bequest.

I give

- **all the residue of my estate or**
- **a share (percentage) of the residue of my estate or**
- **the sum of (insert sum) or**
- **a specific gift (e.g. jewellery, property)**

to the International Association Against Painful Experiments on Animals, P.O. Box 14, Hayling Island, PO11 9BF, England.

and I declare that the receipt of the Treasurer or other proper officer for the time being thereof shall be sufficient discharge to my Executors.

With your help we can save the animals from vivisection and torture. Only you can provide the vital funds.

Remember the International Association Against Painful Experiments on Animals - in your Will and you will be remembered forever - Thank you.
